

Kauan Henrique Bertalha

Back-End Developer (Mid-Level) | C# • .NET • Oracle • SQL Server | Moving into Full Stack

Maringá, Paraná, Brazil · kauan.bertalha@icloud.com

linkedin.com/in/kauanbertalha · github.com/berkhz

Professional Summary

Mid-Level Back-End Developer with 4+ years of experience in technology, working at Benner on the development of enterprise systems with C#, .NET and relational databases such as Oracle, SQL Server and MySQL. Experienced in feature development, system maintenance and evolution, writing and optimizing SQL and PL/SQL queries, system integration through REST APIs, and working in agile teams.

Currently expanding into the Full Stack ecosystem with React, React Native and TypeScript, aiming for an end-to-end view of software development — from the database to the user interface. Bachelor's in Software Engineering from UniCesumar (diploma being issued), with an analytical profile and a strong focus on problem-solving and continuous learning.

Hard Skills

C# • .NET • SQL / PL/SQL • Oracle • SQL Server • MySQL • REST API • Git / GitHub • VBA • Delphi • System Integration • Web Development • Agile Methodologies • Programming Logic

Currently learning: React • React Native • TypeScript • Node.js

Soft Skills

Teamwork • Effective communication • Problem-solving • Analytical thinking • Fast learning • Attention to detail • Adaptability

Professional Experience

Benner

Mid-Level Developer — Jan 2026 – Present | Maringá, Brazil

- Development and maintenance of enterprise systems using C# and .NET.
- Writing and optimizing SQL and PL/SQL queries.
- Working on integrations between systems and REST APIs.
- Code analysis, code reviews and process improvements.
- Contributing to performance improvements and application support.
- Supporting and training new developers.

Junior Developer — Jan 2025 – Jan 2026

- Development of back-end features.
- Bug fixing and evolutionary maintenance.
- Working in agile teams, collaborating on internal projects.

Trainee Developer — Apr 2023 – Jan 2025

- Contributing to the development of enterprise applications.
- Supporting the development and testing of features.
- Continuous learning of architecture and development best practices.

Apprentice — Dec 2021 – Mar 2023

- Supporting development activities and technical support.
- Hands-on experience in a corporate technology environment.

Khrawk Labs

Founder — Jan 2026 – Present | Maringá, Brazil

- **Velo** — an auto-repair shop management SaaS built end-to-end (C# / .NET, PostgreSQL and React), featuring multi-tenant architecture, JWT authentication and automated deployment via Docker/Railway.
- Design and development of SaaS web products, working toward launching my own startup.

Education

UniCesumar — Software Engineering

Jul 2022 – 2026 · Bachelor's degree (diploma being issued)

Certifications

- Game Development with MonoGame 3.8 and C# — Udemy (2026)
- Complete Database and SQL Course — Udemy (2025)
- Algorithms and Programming Logic — Udemy (2025)
- Macros and VBA in Excel — Udemy (2024)
- Git and GitHub: Version Control — Alura (2024)
- Delphi 10 — Udemy (2023)
- C#: Inheritance and Interfaces — Alura (2023)
- C#: Creating and Distributing .NET Libraries — Alura (2022)
- C#: Object-Oriented Programming — Alura (2022)
- C#: Exploring the Language — Alura (2022)
